

Exhibit No. 5Date 2-7-07Bill No. 58312

MRI Center

If this bill does not pass every independent physician and diagnostic service facility will either be run out of state or out of business.

It will also allow the hospitals to have a monopoly and to freely violate antitrust laws. We will no longer have free enterprise with competition to control costs. The consumer will no longer have a choice on where they want to go for care. This is why one of our local hospitals according to a report by the Institute for Health and Socio-Economic Policy, has the biggest markup for drugs by a hospital in America (including both for profit and not-for-profit).

A 3584% markup? Could anything top that?

Description: The markup for drugs by not-for-profit St. Peters Hospital of Helena, MT.

Published: January 17, 2006

7575.8%

That's how much not-for-profit St. Peters Hospital of Helena, Montana marks up their drug prices.

According to a report by the Institute for Health and Socio-Economic Policy, that's the biggest markup for drugs by any hospital in America (including both for profit and not-for-profits).

Helena's first choice
Professional courteous service
State-of-the-art equipment
Board registered MRI professionals
